

Expense Reimbursement Guide

Orchid Retail Finance | Pilot guidance for CentralDocs demo users

Scope

This guide explains how Orchid Retail staff should prepare reimbursement requests during the CentralDocs rollout. It is connected to invoice tracking, vendor onboarding, and remote approvals.

Reimbursable expenses

Eligible items include approved travel to rollout training, store-level printing for training materials, low-cost scanning accessories, and approved vendor setup fees.

Non-reimbursable items include personal devices, meals without approval, duplicate receipts, and purchases made outside the pilot budget.

Required evidence

Each request must include a receipt, business purpose, approving manager, cost center, and related project folder. The CentralDocs generated briefing can be attached only if it includes references.

Approval path

Requests under 2,000 THB are reviewed by the store manager. Requests from 2,000 to 10,000 THB require Finance Coordinator review. Anything higher requires Project Lead approval.

Relationship to invoice tracking

Reimbursements that involve vendors must be cross-checked against Invoice Tracking Sample.xlsx. High-risk or overdue invoices should be flagged before reimbursement approval.

Amount	Approver	CentralDocs evidence needed
Under 2,000 THB	Store Manager	Receipt and business purpose
2,000-10,000 THB	Finance Coordinator	Receipt, cost center, policy reference
Above 10,000 THB	Project Lead	Policy reference and invoice status

Fictional mock document for the CentralDocs portfolio demo. Orchid Retail is not a real company.
